OBJECTIVE

Detail-oriented 8th-semester Software Engineering student seeking an internship to develop my programming and problem-solving abilities through practical experience. Committed to learning from experienced teams, adapting to real world challenges, and building a strong foundation for my career in software development

WORK EXPERIENCE

Frontend Development Intern -Internship Pakistan | Remote

- Completed a remote internship focused on frontend development, building responsive and user-friendly web interfaces.
- Gained practical experience in responsive design, layout structuring, and frontend best practices.
- Collaborated on assigned tasks and strengthened skills in web development, problem-solving, and interface design.

RECENT PROJECTS

Quran App | (Flutter, Firebase)

- Developed a comprehensive Islamic mobile app offering features such as Quran reading with Arabic text and translations, audio recitations, prayer (Namaz) times with notifications, Hadith collection, and Tafsir access. Integrated Firebase for user authentication, real-time database, and cloud storage. Implemented bookmarking, search functionality, and light/dark mode for better user experience. Followed clean architecture and state management principles using Provider.

Dough Story Donuts | (HTML, CSS, JavaScript)

- Designed and developed a responsive website for a donut shop featuring product showcases, animations, and modern UI/UX design. Implemented interactive elements, smooth transitions, and a mobile-friendly layout. Focused on clean front-end development and best web design practices.

Personal Finance System | Java, OOP

- Built a modular personal finance system in Java using core OOP principles to manage income, expenses, and budgets. Emphasized clean architecture, high cohesion, and low coupling for maintainability and scalability.

Travel to World App | (HTML, CSS, JavaScript, Firebase, Firestore)

- Developed a full-stack travel web app with user and admin panels, allowing users to explore destinations, request accommodations, chat, and post reviews while admins manage requests and listings. Implemented Firebase Authentication, Firestore, and real-time chat with a clean, responsive UI for a smooth user experience.

EDUCATION

Bachelor of Science in Software Engineering

Comsats University Islamabad Lahore Campus | 2022-2026

current CGPA =3.25

Related Coursework: Database Systems, Computer Networks, Web Development, Software Project Management, Mobile Application Development, Software Engineering, Artificial Intelligence, Data structure , Machine Learning

FSc in Engineering

Punjab College of commerce for Girls GT Road kamoke Gujranwala | Oct 2022

SKILLS

Tools: Microsoft | Excel | PowerPoint | Figma | GitHub | Postman | Android Studio | VS code | Canva | Google Collab

Technologies: Flutter | Firebase | Supabase | Node.js | UI/UX Design

Programming Languages: Dart | JavaScript | HTML | CSS | SQL | C | Java | Python
